Casement Sash Bulb Seal Replacement

Step 1

Cut the existing welded corners of the bulb seal.

Step 2

Grab the bulb seal and pull it away from the channel to remove.

Step 3

Take the new bulb seal and cut at a 45 degree angle.

Step 4

Start at one side and push/slide the new bulb seal into the channel.

THE PROFESSIONAL WAY

Step 5

Continue feeding into the channel, stopping at the next corner. Cut 1” longer than the sash size.

Step 6

Cut the end of the bulb seal at 45 degree angle. Repeat steps 3 through 6 on the next side.

Step 7

Push the 2 pieces together to form the corner. Can glue bulb seal together if desired. Repeat previous steps to complete bulb seal repair.

**Glue is not required on corners due to our bulb seal is not a water seal.*
