“To serve, by caring for details in ways others won’t.” It’s not just our mission, but a way of letting our light shine every day at ProVia. We continually strive to put these words into action by providing unmatched quality and service. The heart-shaped weep hole symbolizes each employee’s commitment to devoting the utmost care, pride and quality into each building product we manufacture...it’s The Professional Way.

WHY SHOULD YOU INSTALL FULLY VENTED SOFFIT?

- Air always contains water
- When air contacts a cold surface, condensation occurs
- Condensation can damage wood, plaster, paint and insulation
- Damp conditions can lead to mold and mildew growth
- Most states allow exclusion of mold damage from homeowner insurance policies
- Ventilation is critical to help eliminate damage to your home

Vented soffit helps ensure proper ventilation and avoids damage to the home’s interior and exterior by allowing moisture to escape.
