THE PROFESSIONAL WAY

MANUFACTURED

Stone

50
EST. 1977

CELEBRATING 50 YEARS *of* PURPOSE

METICULOUS CARE FOR DETAILS

Stones used to create ProVia® manufactured stone were carefully selected from unique geographic regions. These stones were then skillfully molded and cast, with special care taken to replicate the natural beauty of the undercut to achieve stunning realism. During the production process color is meticulously added to each stone using raw pigments and oxides to achieve a rich, authentic look.

ARTISANSHIP

Through years of experience, innovation and artistic excellence – ProVia stone collections provide enduring beauty that reliably withstands the elements.

DEEP UNDERCUTS

Capturing drama through shadows created by deep undercuts is a technique that produces stone collections of lasting beauty and realism.

LUSH COLORS

From richly textured surfaces to artistically infused colors including ochres, umbers, plums and russets - ProVia stone collections add warmth and beauty to any home.

PIONEERING THE WAY TO EXACTING STANDARDS

We use nothing but the finest materials in our products including superior shale aggregates. Each mixture of base material is quality controlled for batch-to-batch consistency. Our leading edge processes and equipment ensure that every step in the creation of our products is optimized for aesthetics and consistency. A relentless pursuit of quality and excellence in products and services distinguishes us from other stone manufacturers and helps us deliver real value to every customer, every day.

INDUSTRY ASSOCIATION, ACCREDITATION AND TESTING

ProVia is leading the way in quality adherence, having completed **CMHA's Manufactured Stone Veneer Product Certification Program**, which certifies ProVia products as achieving a benchmark in the industry for Physical Properties, Shear Bond Strength, Freeze-Thaw Durability and Linear Drying Shrinkage.

Additionally, ProVia stone products are voluntarily third-party tested and certified through the **IAPMO** product certification agency and meet or exceed ASTM, IBC and IRC standards.

ProVia is a proud member of the **Masonry Stone Veneer** committee of the **Concrete Masonry & Hardscapes Association**, which is the voice of our industry. As such, we support advocacy in building code and ASTM standards, quality materials, installation and design.

It's just one more way we serve our customers, by caring for details in ways others won't.

ENHANCED COLORING SYSTEMS

ProVia® is proud to offer two industry-original, enhanced coloring processes that are designed to capture the beauty of real stone colors, while elevating the vibrant intensity of the stone collection for maximum depth and dramatic curb appeal.

The **ENHANCED** coloring process combines artisan crafting with our state-of-the-art manufacturing processes involving special molds and multiple stages of hand-layering rich pigments.

Look for this symbol next to the Enhanced colors featured in our catalog:

NIAGARA TERRA CUT™

HAND COLORING

Through years of experience, innovation and artistic excellence, ProVia® utilizes a state-of-the-art manufacturing process to create beautifully textured stones that are hand colored to capture the beauty and uniqueness seen in nature. **As with any artisanal product, there will be variance from piece-to-piece.**

MOISTURE CONTENT

Manufactured stone is made from a concrete mixture that contains high-quality, lightweight aggregates and Portland cement that are combined with water, and then wet cast into molds.

The higher the moisture content of a stone, the darker and more saturated its appearance. **The stone will lighten as the moisture equalizes**. The moisture content in the stone may take **up to 6 months** to equalize, depending on weather conditions. Most installations require multiple boxes of stone, which may be at varied stages of curing.

Uncured Stone

Cured Stone

GROUT COLOR IMPACT

COLOR REFLECTS YOUR DISTINCT PERSONALITY

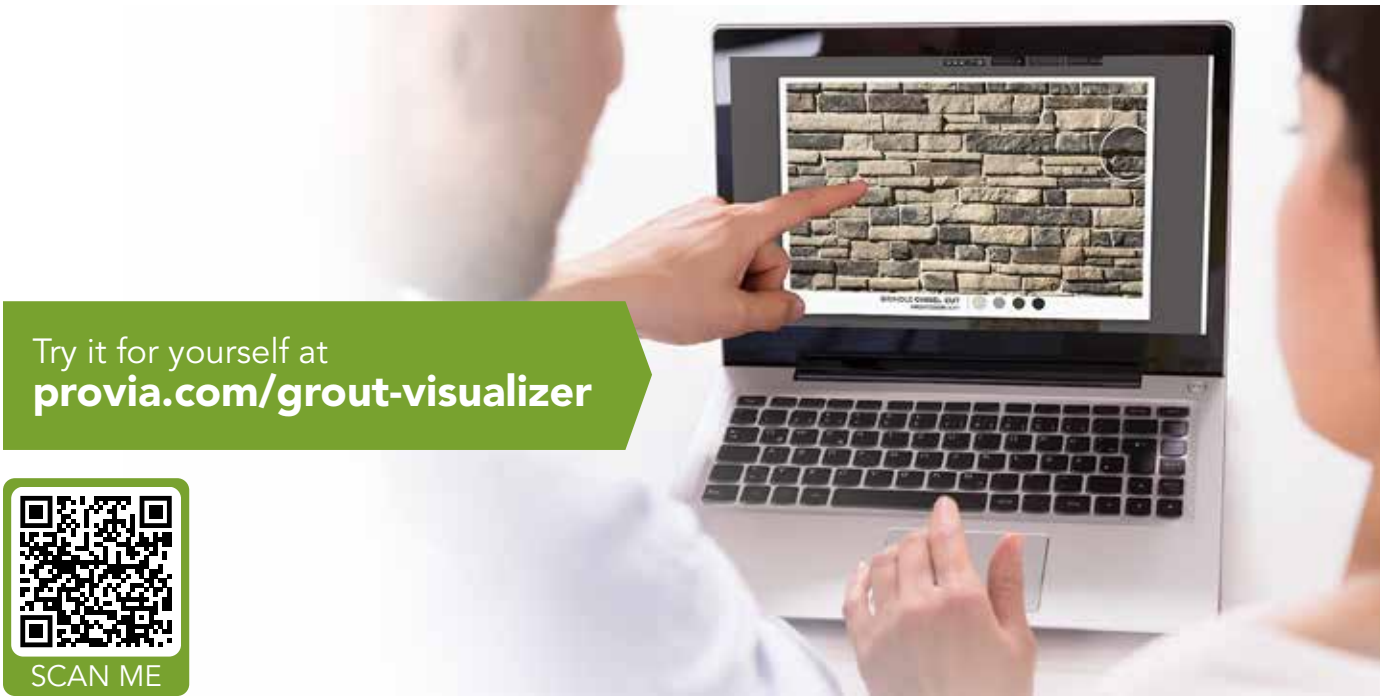

When considering stone colors and profiles, the choice of grout color is crucial as it can make a significant difference in the overall look of the stone installation.

For many homeowners however, grout color is nearly impossible to visualize, and dealer showrooms are unable to inventory the hundreds of sample boards that would be required to demonstrate all the various options.

Our industry-exclusive **Grout Color Visualizer** was designed to make it easy to explore a variety of customized stone and grout color combinations. The Visualizer allows you to preview stone profiles, color palettes, and matching or contrasting grout colors to determine the combo that best suits your style.

For more information on grout techniques, see page 104.

Stone by COLOR COLLECTIONS

GATHERING INSPIRATION FROM NATURE

ProVia® Manufactured Stone is thoughtfully organized into eight color collections, grouping similar tones together for a more intuitive browsing experience. This arrangement not only enhances visual harmony but also makes it easier to find the perfect match for your project, whether you're aiming for subtle elegance or bold contrast.

Our color collections are inspired by the natural beauty found in landscapes across the country. From the warm earth tones of the Southwest to the cool grays of coastal cliffs and the rich, rustic hues of the mountains, each collection reflects the authentic colors you see in nature. This approach brings a timeless, organic feel to any project, blending effortlessly with the surrounding environment.

FIREPLACE ACCENTS

ProVia Manufactured Stone adds warmth, character, and rich color to interior features such as fireplaces, creating a striking focal point in any room. With a variety of natural textures, colors, and profiles, it offers a versatile way to enhance your home's interior with timeless charm and distinctive style.

NATURAL
Color Collection

Our Natural Color Collection features a carefully curated range of blended tones inspired by the subtle beauty of the outdoors. These colors mimic the layered, weathered hues found in natural stone formations, creating a look that feels organic and timeless.

The Natural color collection can be paired with a sampling of other ProVia® products to create an amazing look with complementary or contrasting colors.

NATURAL
Complementary Trim Color

BUFF
Contrasting Trim Color

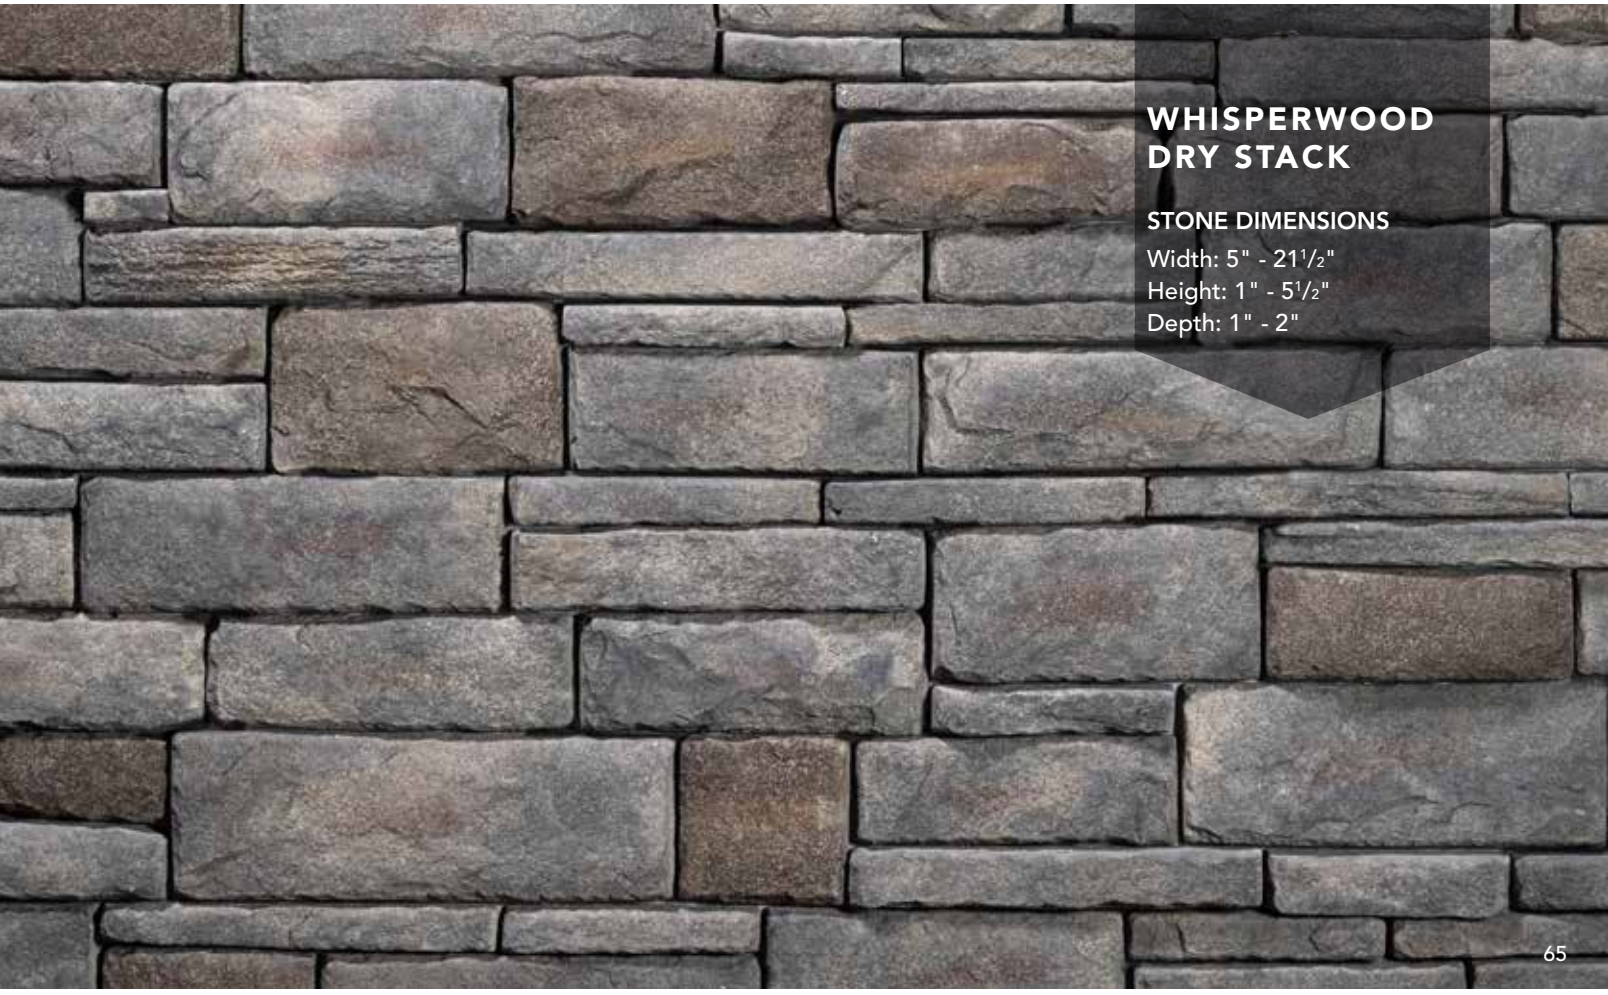

ProVia goes to great lengths to ensure our Manufactured Stone properly depicts natural cut stone. Organic, natural pigments are skillfully applied by hand, producing remarkable variety in stone color and patterns. Care has been taken to ensure the images in this catalog represent the actual product as closely as possible. Factors such as printing techniques and digital screen settings can alter the way colors are represented in print and online.
We recommend that a physical sample is always referenced when choosing a stone for your project.

PROFESSIONAL-CLASS:

THE DIFFERENCE BETWEEN STANDARD AND STAND OUT.

Did you know? We are committed to providing the best quality manufactured stone products. Our products and methods are tested using ASTM C1670 standards. These tests are completed in accordance with the Concrete Masonry and Hardscapes Association and Development Laboratory. Not all manufacturers comply with this third-party endorsement that ensures code compliance, but that is where our professional-class products make the difference between standard and stand out.

To learn more details about our stone certifications and technical information, visit provia.com/stone/technology

DENALI RIDGE CUT™

Stone by PROFILE

ProVia® manufactured stone is designed and artfully crafted to replicate the natural beauty and character of authentic stone. Produced using molds made from organic quarried stone, our profiles exhibit exceptional realism and quality. The result is a durable, attractive product that adds elegance and curb appeal to your home.

Our distinctive stone profiles offer a style and color palette to suit any exterior architectural design and interior accent. Browse our collection of unique and tasteful stone profiles, and get inspired by examples of beautiful stone veneer applications.

FERNWOOD NATURAL CUT™

NATURAL CUT™

Country charm and character

A ProVia® original, this stone veneer profile utilizes slab configurations with irregular sizes and varied textures to re-create the appeal of Old Country architecture. Rugged edges portray a chiseled, uniform look, while the disparate proportions provide a break in the block formations. Add our Natural Cut stone in small doses, like porch columns or entryways, to enhance the visual appeal of your home or make a bold statement with a whole new exterior that emulates the look of a historic mansion or fortress.

AMHERST LIMESTONE

LIMESTONE

Classic character and contours

Traditional limestone cladding has been popular for centuries – you might say it's the bedrock of stone veneer. Architectural styles dating back to the colonial period exhibit extensive use of this sedimentary stone. Our Limestone stone veneer collection includes nine chiseled square and rectangular stone profiles, replicated from stones originating in the Midwest, for a simple, classic, and natural look.

GROUTING TECHNIQUES

A SMALL DETAIL THAT CAN DRAMATICALLY CHANGE THE CHARACTER OF STONE

Grout does more than fill the spaces between stones—it plays an important role in the overall appearance of your finished stonework. Along with choosing the stone's style, size and color, selecting the right grouting technique allows you to customize the look to complement your home.

The most common grouting technique is the **Standard or Raked Joint**, often seen in traditional brickwork. Grout is applied evenly between the stones, creating a consistent, recessed joint. This classic technique emphasizes the shape and pattern of the stone while delivering a timeless appearance.

For a more rustic, old-world look, consider Overgrouting. This technique uses wider grout joints that may be flush with or extend beyond the stone's surface. In some applications, grout partially covers the face of the stone, creating a weathered, timeworn appearance. Overgrouting is especially popular with larger, irregularly shaped stones.

For a more natural, casual appearance, Dry Stack offers a groutless alternative. Mortar is applied behind the stones to secure them in place, leaving no visible grout between them. The result creates the impression of stones stacked directly on top of one another.

Dry stack installations may require special consideration in regions with frequent freeze-thaw cycles. Consult your stone mason about the suitability of this technique for your area, and always follow applicable CMHA guidelines for installation.

ProVia® manufactured stone offers natural, enduring beauty, and the right grouting technique can further enhance its character. Grout can also be colored or tinted to complement your stone selection and achieve your desired look – see page 8 for more information on designing with grout colors.

Whether your vision is classic, rustic or contemporary, the right grouting technique helps bring it to life. With a variety of styles and colors to choose from, you can create a distinctive stone design that reflects your personal style.

HOW LIGHTING AFFECTS THE WAY YOU SEE COLOR

EXTERIOR APPLICATIONS

Choosing the color of stone for your home's exterior is important to you. Making the right color choice can increase curb appeal and the value of your home.

As you look at all the different styles and colors of ProVia® stone products, it is important to factor in lighting when making your choice. Daylight, or more specifically, direct sunlight versus indirect sunlight, impacts how color is perceived.

In the image above, notice how the direct sunlight has a dramatic effect on the color of the stone. Direct sunlight can also create dramatic shadow lines providing increased visual appeal.

As you look at the stone colors in the shaded parts of the home, it begins to take on a completely different look and feel. Colors become less vivid creating a softer, more subtle look. Shadow lines are reduced and sometimes eliminated.

INTERIOR APPLICATIONS

ProVia stone products can also be installed on the interior of your home. Fireplaces, kitchens, family room accents…our diverse selection of stone profiles and colors can create pleasant, welcoming atmospheres within the walls of your home.

Color is affected by the lighting inside your home, and lighting can have a tremendous impact on how you see color, as shown in the picture above. Light reflected from painted walls, stained wood, and colored carpeting, for example, can provide dramatic color shifts that can make the stone color appear different, creating an impressive atmosphere within your home.

When choosing your ProVia stone products for exterior or interior purposes, we encourage you to look at our colors within the environments they will be installed in. This will provide you with a truer representation of what you can expect to see with your finished project.

SHAWNEE DRY STACK & BUCKINGHAM LIMESTONE BLEND

PROFESSIONAL INSTALLATION FAQ

FOR YEARS OF GUARANTEED BEAUTY

Q: Will my stone fade once installed?

A: Some color change can be expected following installation. See page 7 for more information about the natural curing process.

Q: How should I prep my doors and windows?

A: Make sure all openings are properly flashed before applying stone. This prevents water seepage from going under the application which will cause it to fail. Visit the CMHA website at www.masonryandhardscapes.org for more information.

Q: Do I have to use grout?

A: Your stone does not have to be grouted unless it is installed in regions where seasonal freeze/thaw is common. When installing a dry stack application always refer to CMHA guidelines.

Q: Can I use Hearthstones as pavers?

A: No, Hearthstones are not approved for foot traffic.

Q: Do you provide products for overhead installation (ceilings, overhangs, etc. with one surface adhesion)?

A: Consult with your Stone Mason and current CMHA guidelines for details in these types of installations.

Q: How close to the ground can these stones be installed?

A: The stone should be installed no closer than 4" to the final grade or 2" to a hard surface (sidewalk, driveway, etc.)

Q: How should I clean my stone?

A: Visit our Stone Installation page at provia.com to view our video on proper cleaning procedures. Do not use power washers or harsh chemicals on or around ProVia® stone products as damage may occur.

Q: Does a glossy appearance to the back of the stone affect adhesion?

A: No, the average shear bond strength for ProVia Manufactured Stone products is 200% higher than the industry minimum requirement set by CMHA.

Q: Will I need anything besides stone flats and corners to finish my project?

A: Yes. When there are transitions, etc., be sure to ask about trim and architectural accessories to give your project a polished and complete look (see pages 100-103 in this catalog for details).

Q: Can I only use one kind of stone?

A: Not at all, see pages 106 & 107, or ask about our custom mixed stone applications when creating unique looks.

Q: What is the warranty on my stone?

A: ProVia stone products carry a Lifetime Limited Warranty against faulty manufacturing process or defective materials as follows:

The installation must be in compliance with the applicable specifications and requirements and the stone subjected only to normal exposure and use. ProVia guarantees its stone products against chipping, flaking, unsightly discoloration or any other serious deterioration. Warranty coverage is limited to replacement or repair of defective materials only and does not cover labor to remove or replace materials. Warranty coverage is limited to the original purchaser. The manufacturer will not be liable for any damage or defects due to misuse, building movement, installation, acts of God, fire or any other cause beyond the manufacturer's control.
For the most current information, please visit the warranty section of our website at: provia.com/warranty.

GLOSSY BACKING

As a result of the manufacturing process, our manufactured stone may have a glossy, smoother than expected back. This is a normal result of the manufacturing process and does not affect the bond strength. In fact, the average shear bond strength for ProVia manufactured stone products is **200% higher than the industry minimum requirement set by CMHA**. There are many factors involved in ensuring a proper bond including choosing the right mortar, moisture level of the scratch coat, and more.

We love seeing how you apply our products to your home. Please share your photos with us.

50 YEARS *of* PURPOSE

Thank You for Being Part of Our Story

As ProVia® commemorates its 50th Anniversary, we extend our sincere gratitude to homeowners like you for your trust and support over the years. This milestone is not ours alone. The confidence our customers have placed in us has been an important part of our story and our success.

Our Purpose defines why we exist: *To let our light shine before others, so that they may see our good works and give glory to our Father who is in heaven (adapted from Matthew 5:16).*

The ProVia team has always embraced opportunities to demonstrate our purpose, vision, and values. Each member is committed to serving our customers faithfully, by manufacturing exceptional home exterior products and delivering unmatched quality and service.

That commitment has been part of who we are since Bill Mullet founded the company in 1977. For five decades, our faith has inspired us to serve others with integrity, ingenuity, honor, and honesty. Our commitment to putting customers first and pursuing the highest standards of quality continues to guide everything we do.

Thank you for welcoming us to your home. As we celebrate 50 years, we look forward to serving homeowners like you with the same purpose, passion, and dedication for generations to come.

Brian Miller
President & CEO
