MANUFACTURED
STONE

METICULOUS CARE FOR DETAILS

Stones used to create ProVia® manufactured stone were carefully selected from unique geographic regions. These stones were then skillfully molded and cast, with special care taken to replicate the natural beauty of the undercut to achieve stunning realism. During the production process color is meticulously added to each stone using raw pigments and oxides to achieve a rich, authentic look.

ARTISANSHIP

Through years of experience, innovation and artistic excellence – ProVia stone collections provide enduring beauty that reliably withstands the elements.

DEEP UNDERCUTS

Capturing drama through shadows created by deep undercuts is a technique that produces stone collections of lasting beauty and realism.

LUSH COLORS

From richly textured surfaces to artistically infused colors including ochres, umbers, plums and russets - ProVia stone collections add warmth and beauty to any home.

PIONEERING THE WAY TO EXACTING STANDARDS

We use nothing but the finest materials in our products including superior shale aggregates. Each mixture of base material is quality controlled for batch-to-batch consistency. Our leading edge processes and equipment ensure that every step in the creation of our products is optimized for aesthetics and consistency. A relentless pursuit of quality and excellence in products and services distinguishes us from other stone manufacturers and helps us deliver real value to every customer, every day.

INDUSTRY ASSOCIATION, ACCREDITATION AND TESTING

ProVia is leading the way in quality adherence, having completed **CMHA's Manufactured Stone Veneer Product Certification Program**, which certifies ProVia products as achieving a benchmark in the industry for Physical Properties, Shear Bond Strength, Freeze-Thaw Durability and Linear Drying Shrinkage.

Additionally, ProVia stone products are voluntarily third-party tested and certified through the **IAPMO** product certification agency and meet or exceed ASTM, IBC and IRC standards.

ProVia is a proud member of the **Masonry Stone Veneer** committee of the **Concrete Masonry & Hardscapes Association**, which is the voice of our industry. As such, we support advocacy in building code and ASTM standards, quality materials, installation and design.

It's just one more way we serve our customers, by caring for details in ways others won't.

COLORS FOR 2026

We are excited to introduce three new colors to give you an even wider array of options to complete your project.

BRECKENRIDGE FIELDSTONE

MIDLAND TERRA CUT™

PALISADE TERRA CUT™

ENHANCED COLORING SYSTEMS

ProVia® is proud to offer two industry-original, enhanced coloring processes that are designed to capture the beauty of real stone colors, while elevating the vibrant intensity of the stone collection for maximum depth and dramatic curb appeal.

The **ENHANCED** coloring process combines artisan crafting with our state-of-the-art manufacturing processes involving special molds and multiple stages of hand-layering rich pigments.

Look for this symbol next to the **Enhanced** colors featured in our catalog:

- Alpine PrecisionFit™
- Alta Natural Cut™
- Arctic PrecisionFit™
- Boston Thin Brick
- Breckenridge Fieldstone
- Cobblestone Thin Brick
- Delaware Thin Brick
- Frost Terra Cut™
- Graphite Terra Cut™
- Harbor Limestone
- Midnight Thin Brick
- Mystic LedgeStone
- Obsidian Edge Cut™
- Onyx PrecisionFit™

SILVERLAKE CHISEL CUT™

NIAGARA TERRA CUT™

HAND COLORING

Through years of experience, innovation and artistic excellence, ProVia® utilizes a state-of-the-art manufacturing process to create beautifully textured stones that are hand colored to capture the beauty and uniqueness seen in nature. **As with any artisanal product, there will be variance from piece-to-piece.**

MOISTURE CONTENT

Manufactured stone is made from a concrete mixture that contains high-quality, light weight aggregates and Portland cement that are combined with water, and then wet cast into molds.

The higher the moisture content of a stone, the darker and more saturated it's appearance. **The stone will lighten as the moisture equalizes.** The moisture content in the stone may take **up to 6 months** to equalize, depending on weather conditions. Most installations require multiple boxes of stone, which may be at varied stages of curing.

Uncured Stone

Cured Stone

GROUT COLOR IMPACT

COLOR REFLECTS YOUR DISTINCT PERSONALITY

When considering stone colors and profiles, the choice of grout color is really a big deal as it can make a significant difference in the overall look of the stone installation.

For many homeowners however, grout color is nearly impossible to visualize, and dealer showrooms are unable to inventory the hundreds of sample boards that would be required to demonstrate all the various options.

That's why our industry exclusive **Grout Color Visualizer** was created to open up your mind to all the different looks you can create using various combinations of stone and grout from the comfort of your home.

For more information on grout techniques, see page 96.

Stone by COLOR COLLECTIONS

GATHERING INSPIRATION FROM NATURE

ProVia® Manufactured Stone is thoughtfully organized into eight color collections, grouping similar tones together for a more intuitive browsing experience. This arrangement not only enhances visual harmony but also makes it easier to find the perfect match for your project, whether you're aiming for subtle elegance or bold contrast.

Our color collections are inspired by the natural beauty found in landscapes across the country. From the warm earth tones of the Southwest to the cool grays of coastal cliffs and the rich, rustic hues of the mountains, each collection reflects the authentic colors you see in nature. This approach brings a timeless, organic feel to any project, blending effortlessly with the surrounding environment.

TAN

Color Collection

Our Tan Color Collection is inspired by the warm, sunlit tones found in nature—from sandy riverbanks to weathered canyon walls. These naturally derived hues give our manufactured stone a grounded, inviting look that blends seamlessly with your home design.

The Tan color collection can be paired with a sampling of other ProVia® products to create an amazing look with complementary colors:

- Yuma Terra Cut™
- Sea Slate Siding
- Sea Slate Board 'n Batten Siding
- Bronzewood Shake Metal Roofing
- White Endure™ Windows
- English Chestnut Signet® Entry Door

ProVia goes to great lengths to ensure our Manufactured Stone properly depicts natural cut stone. Organic, natural pigments are skillfully applied by hand, producing remarkable/incredible variety in stone color and patterns. Care has been taken to ensure the images in this catalog represent the actual product as closely as possible. Factors such as printing techniques and digital screen settings can alter the way colors are represented in print and online.

We recommend that a physical sample is always referenced when choosing a stone for your project

USE MANUFACTURED STONE AS A FEATURE OR ACCENT IN ANY BUILDING DESIGN.

Manufactured stone is a versatile and striking design feature that can be used to great effect

in enhancing structural elements such as entryways, front porches, patios, and garages.

Exterior stone veneer is also a great way to beautify outbuildings like sheds, workshops and pool houses.

NATURAL

Color Collection

Our Natural Color Collection features a carefully curated range of blended tones inspired by the subtle beauty of the outdoors. These colors mimic the layered, weathered hues found in natural stone formations, creating a look that feels organic and timeless.

The Natural color collection can be paired with a sampling of other ProVia® products to create an amazing look with complementary colors:

- Saginaw Ledgerstone
- Timberline Siding
- Clay Board 'n Batten Siding
- Bronzewood Shake Metal Roofing
- Endure™ Windows with Classic Bronze exterior
- Espresso Signet® Entry Door

ProVia goes to great lengths to ensure our Manufactured Stone properly depicts natural cut stone. Organic, natural pigments are skillfully applied by hand, producing remarkable/incredible variety in stone color and patterns. Care has been taken to ensure the images in this catalog represent the actual product as closely as possible. Factors such as printing techniques and digital screen settings can alter the way colors are represented in print and online.

We recommend that a physical sample is always referenced when choosing a stone for your project

PROFESSIONAL-CLASS

THE DIFFERENCE BETWEEN STANDARD AND STAND OUT.

Did you know? We are committed to providing the best quality manufactured stone products. Our products and methods are tested using ASTM C1670 standards. These tests are completed in accordance with the Concrete Masonry and Hardscapes Association and Development Laboratory. Not all manufacturers comply with this third-party endorsement that ensures code compliance, but that is where our professional class products make the difference between standard and stand out.

To learn more details about our stone certifications and technical information, visit provia.com/stone/technology

DENALI RIDGE CUT™

Stone by PROFILE

ProVia® is a leading manufacturer of stone products for residential and commercial applications. Artfully crafted and designed to replicate the beauty and elegance of natural stones, each ProVia stone is manufactured for exceptional realism and quality. The result is a product that will reflect its original beauty for years to come. ProVia can help take what you've imagined and bring it to life.

The following pages show examples of how ProVia stone products have turned dreams into reality for homeowners just like you. ProVia offers distinct stone profiles that offer completely unique looks that will fit any design style.

DELAWARE THIN BRICK

THIN BRICK

Handmade and stylish

Thin Brick embodies the texture, composition, and natural shades of genuine hand-made brick. Inspired by and molded from handmade, kiln-fired clay brick, this profile offers the definitive and consistent characteristics of traditional brickwork.

RUSSET TERRA CUT™

FERNWOOD NATURAL CUT™

NATURAL CUT™

Add a touch of old country charm

A ProVia® original, this stone veneer profile utilizes slab configurations with irregular sizes and varied textures to re-create the appeal of Old Country architecture. Rugged edges portray a chiseled, uniform look, while the disparate proportions provide a break in the block formations. Add our Natural Cut stone in small doses, like porch columns or entryways, to enhance the visual appeal of your home or make a bold statement with a whole new exterior that emulates the look of a historic mansion or fortress.

AMHERST LIMESTONE

LIMESTONE

Classic shape and texture

Traditional limestone cladding has been popular for centuries – you might say it's the bedrock of stone veneer. Architectural styles dating back to the colonial period exhibit extensive use of this sedimentary stone. Our Limestone stone veneer collection includes nine chiseled square and rectangular stone profiles, replicated from stones originating in the Midwest, for a simple, classic, and natural look.

STONE TRIM & ACCESSORIES

THE FINISHING TOUCHES MAKE THE DIFFERENCE

ProVia® offers all the accessories you will need to professionally complete your project. Take advantage of the various shapes, sizes and colors to make a project uniquely yours. Easy to manipulate, easy to install - our trims and accent pieces finish off a design to showcase a project's most beautiful attributes. Consult the color collection sections of this catalog for recommended combinations - or design your own original creation.

ADDRESS STONES

Address stones are a great way to add that final polish and further enhance curb appeal to any project. Available in Gray Limestone or Buff Sandstone. The address stones are made to be mounted horizontally and can accommodate up to 5 numbers that will be painted black, in the Times New Roman font pictured. There is also an optional pinstripe that can be added around the numbers. Please allow 1 to 2 weeks lead time.

GRAY LIMESTONE

BUFF SANDSTONE WITH PINSTRIPE OPTION

Address stones are manufactured out of natural stone. Slight variations in color or veining may occur.

COLORS

Stone trim and accessories are available in all colors unless otherwise noted.

GROUTING TECHNIQUES

A SMALL DETAIL THAT CAN DRAMATICALLY CHANGE THE CHARACTER OF STONE

Grout truly brings your stonework together. With traditional grouting methods, it is the grout that fills the voids between stones. Grout also plays an important part in the overall visual appearance of your finished stonework.

Selecting the type, size and color of the stone is only part of the customization process. You can select from several different grouting styles to further create the perfect look for your home.

The most common grout technique is a **standard or raked joint**. This is what you typically see with brickwork, for example. The grout is evenly applied around the edge of each stone or brick. When finished,

the grout appears as a recessed even layer, filling the gaps between stones and bricks. This is a classic, traditional technique that provides timeless beauty.

For a more old-world look, choose **overgrouting**. This technique uses a much heavier grout seam. Depending on the look you want, the grout can be even with or extend beyond the face of the stone, rather than being recessed like the standard

grout technique. Grout may even partially cover the face of the stone. The overgrout technique is especially popular with larger, irregularly shaped stones.

Many homeowners now choose the **dry stack** style of stonework, which is actually groutless. Mortar is used behind the stone to secure it in place, but there is no grout visible between the stones. This gives the work a

very natural, casual appearance. It appears as though the stones are simply stacked on top of one another. Dry stacked applications are not recommended where freeze/thaw is common. Consult with your Stone Mason regarding dry stack applications in your specific region and always refer to CMHA guidelines for details in these types of installations.

It appears as though the stones are simply stacked on top of one another. Dry stacked applications are not recommended where freeze/thaw is common. Consult with your Stone Mason regarding dry stack applications in your specific region and always refer to CMHA guidelines for details in these types of installations.

All of ProVia® stone has a natural, ageless beauty. You can fine-tune that beauty by selecting the grouting technique that best matches your design goals.

The ability to color or tint grout provides you with additional flexibility to create exactly the look you have in mind. See page 96 for more information on designing with grout colors.

Whether you want to project a classic, rustic or contemporary look, there is a grout technique available to fulfill your vision. Unlimited options give you the freedom to create your unique canvas in stone.

LIMITLESS OPTIONS

BLENDING STYLES AND COLORS

For those creative individuals, we offer the ability to mix and match stone groupings to form a completely new look. Design for a natural setting, a special gathering area of your home or yard and even your furnishings or other exterior elements to create that distinctively unique look.

THE IMAGE ON THE NEXT PAGE SHOWS THESE TWO PROFILES BLENDED TOGETHER TO CREATE A UNIQUE LOOK.

STONE VERSATILITY

Go for a unique look to distinguish your next project. We offer the ability to beautifully mix and match two or more collections to form a completely different look. At ProVia®, we can recommend mixes of stones based on our extensive years of experience or create your own look. You're limited only by your imagination.

HOW LIGHTING AFFECTS THE WAY YOU SEE COLOR

EXTERIOR APPLICATIONS

Choosing the color of stone for your home's exterior is important to you. Making the right color choice can increase curb appeal and the value of your home.

As you look at all the different styles and colors of ProVia® stone products, it is important to factor in lighting when making your choice. Daylight, or more specifically, direct sunlight versus indirect sunlight, impacts how color is perceived.

In the image above, notice how the direct sunlight has a dramatic affect on the color of the stone. Direct sunlight can also create dramatic shadow lines providing increased visual appeal.

As you look at the stone colors in the shaded parts of the home, it begins to take on a completely different look and feel. Colors become less vivid creating a softer, more subtle look. Shadow lines are reduced and sometimes eliminated.

INTERIOR APPLICATIONS

ProVia stone products can also be installed on the interior of your home. Fireplaces, kitchens, family room walls...our diverse selection of stone profiles and colors can create pleasant, welcoming atmospheres within the walls of your home.

Color is affected by the lighting inside your home, and lighting can have a tremendous impact on how you see color, as shown in the picture above. Light reflected from painted walls, stained wood, and colored carpeting, for example, can provide dramatic color shifts that can make the stone color appear different. Thus, creating an impressive atmosphere within your home.

When choosing your ProVia stone products for exterior or interior purposes, we encourage you to choose carefully, and look at our colors within the environments they will be installed in. This will provide you with a truer representation of what you can expect to see with your finished project.

PROFESSIONAL INSTALLATION FAQ

FOR YEARS OF GUARANTEED BEAUTY

Q: Will my stone fade once installed?

A: Some color change can be expected following installation. See page 7 for more information about the natural curing process.

Q: How should I prep my doors and windows?

A: Make sure all openings are properly flashed before applying stone. This prevents water seepage from going under the application which will cause it to fail. Visit the CMHA website at www.masonryandhardscapes.org for more information.

Q: Do I have to use grout?

A: Your stone does not have to be grouted as long as the installation is in an area where freeze/thaw is not common. When installing a dry stack application always refer to CMHA guidelines.

Q: Can I use Hearthstones as pavers?

A: No, Hearthstones are not approved for foot traffic.

Q: Do you provide products for overhead installation (ceilings, overhangs, etc. with one surface adhesion)?

A: Consult with your Stone Mason and current CMHA guidelines for details in these types of installations.

Q: How close to the ground can these stones be installed?

A: The stone should be installed no closer than 4" to the final grade or 2" to a hard surface (sidewalk, driveway, etc.)

Q: How should I clean my stone?

A: Visit our Stone Installation page at provia.com to view our video on proper cleaning procedures. Do not use power washers or harsh chemicals on or around ProVia® stone products as damage may occur.

Q: Does a glossy appearance to the back of the stone affect adhesion?

A: No, the average shear bond strength for ProVia Manufactured Stone products is 200% higher than the industry minimum requirement set by CMHA.

Q: Will I need anything besides stone flats and corners to finish my project?

A: Yes. When there are transitions, etc., be sure to ask about trim and architectural accessories to give your project a polished and complete look (see pages 92-95 in this catalog for details).

Q: Can I only use one kind of stone?

A: Not at all, See pages 98 & 99, or ask about our custom mixed stone applications when creating unique looks.

Q: What is the warranty on my stone?

A: ProVia stone products carries a Lifetime Limited Warranty against faulty manufacturing process or defective materials as follows:

The installation must be in compliance with the applicable specifications and requirements and the stone subjected only to normal exposure and use. ProVia guarantees its stone products against chipping, flaking, unsightly discoloration or any other serious deterioration. Warranty coverage is limited to replacement or repair of defective materials only and does not cover labor to remove or replace materials. Warranty coverage is limited to the original purchaser. The manufacturer will not be liable for any damage or defects due to misuse, building movement, installation, acts of God, fire or any other cause beyond the manufacturer's control. For the most current information, please visit the warranty section of our website at: provia.com/warranty.

GLOSSY BACKING

As a result of the manufacturing process, our manufactured stone may have a glossy, smoother than expected back. This is a normal result of the manufacturing process and does not affect the bond strength. In fact, the average shear bond strength for ProVia manufactured stone products is **200% higher than the industry minimum requirement set by CMHA**. There are many factors involved in ensuring a proper bond including choosing the right mortar, moisture level of the scratch coat, and more.

Scan this QR code to view tips for achieving a lasting bond.

DISCOVER MORE

WEBSITE

ProVia.com makes it easy to explore and compare numerous door, window, siding, stone or roofing options in a straightforward, interactive way. Configure a door or window, visualize products on your home, explore color palettes, and learn about different architectural styles—all from our innovative Design Center. Save your favorite products, colors, photos or ideas throughout the site into your own ProVia® portfolio for reference any time and share them across your favorite social media platforms.

VISUALIZER

Let your imagination run free with this exterior home design tool. Select from a library of existing home styles or upload a photo of your own home.

In a few easy steps, update your siding color, add stone or metal roofing, configure windows, or create a one-of-a-kind entry door system.

Looking for professionally inspired color and product palettes? Apply one of our pre-selected Designer Collections to create a curb-appealing look.

APP

Use the ProVia app to configure doors and windows or select from an extensive collection of vinyl siding, manufactured stone and metal roofing styles.

Features:

- Door and Window Configuration
- Vinyl Siding Profiles, Colors and Accessory Accents
- Manufactured Stone Styles, Color Palettes and Grout Options
- Metal Roofing Profiles, Trims and Colors
- Videos, Photo Galleries and Catalogs

SOCIAL MEDIA

We love seeing how you apply our products to your home. Please share your photos with us.

"To serve, by caring for details in ways others won't." It's not just our mission, but a way of letting our light shine every day at ProVia®. We continually strive to put these words into action by providing unmatched quality and service. The P-icon symbolizes each employee's commitment to devoting the utmost care, pride and quality into each building product we manufacture...it's The Professional Way.
