INDUSTRY ASSOCIATIONS, ACCREDITATION AND TESTING

WDMA MEMBER

Through its membership with WDMA, ProVia collaborates on standards and advocacy efforts to advance the window and door industry.

FGIA Fenestration & Glazing Industry Alliance

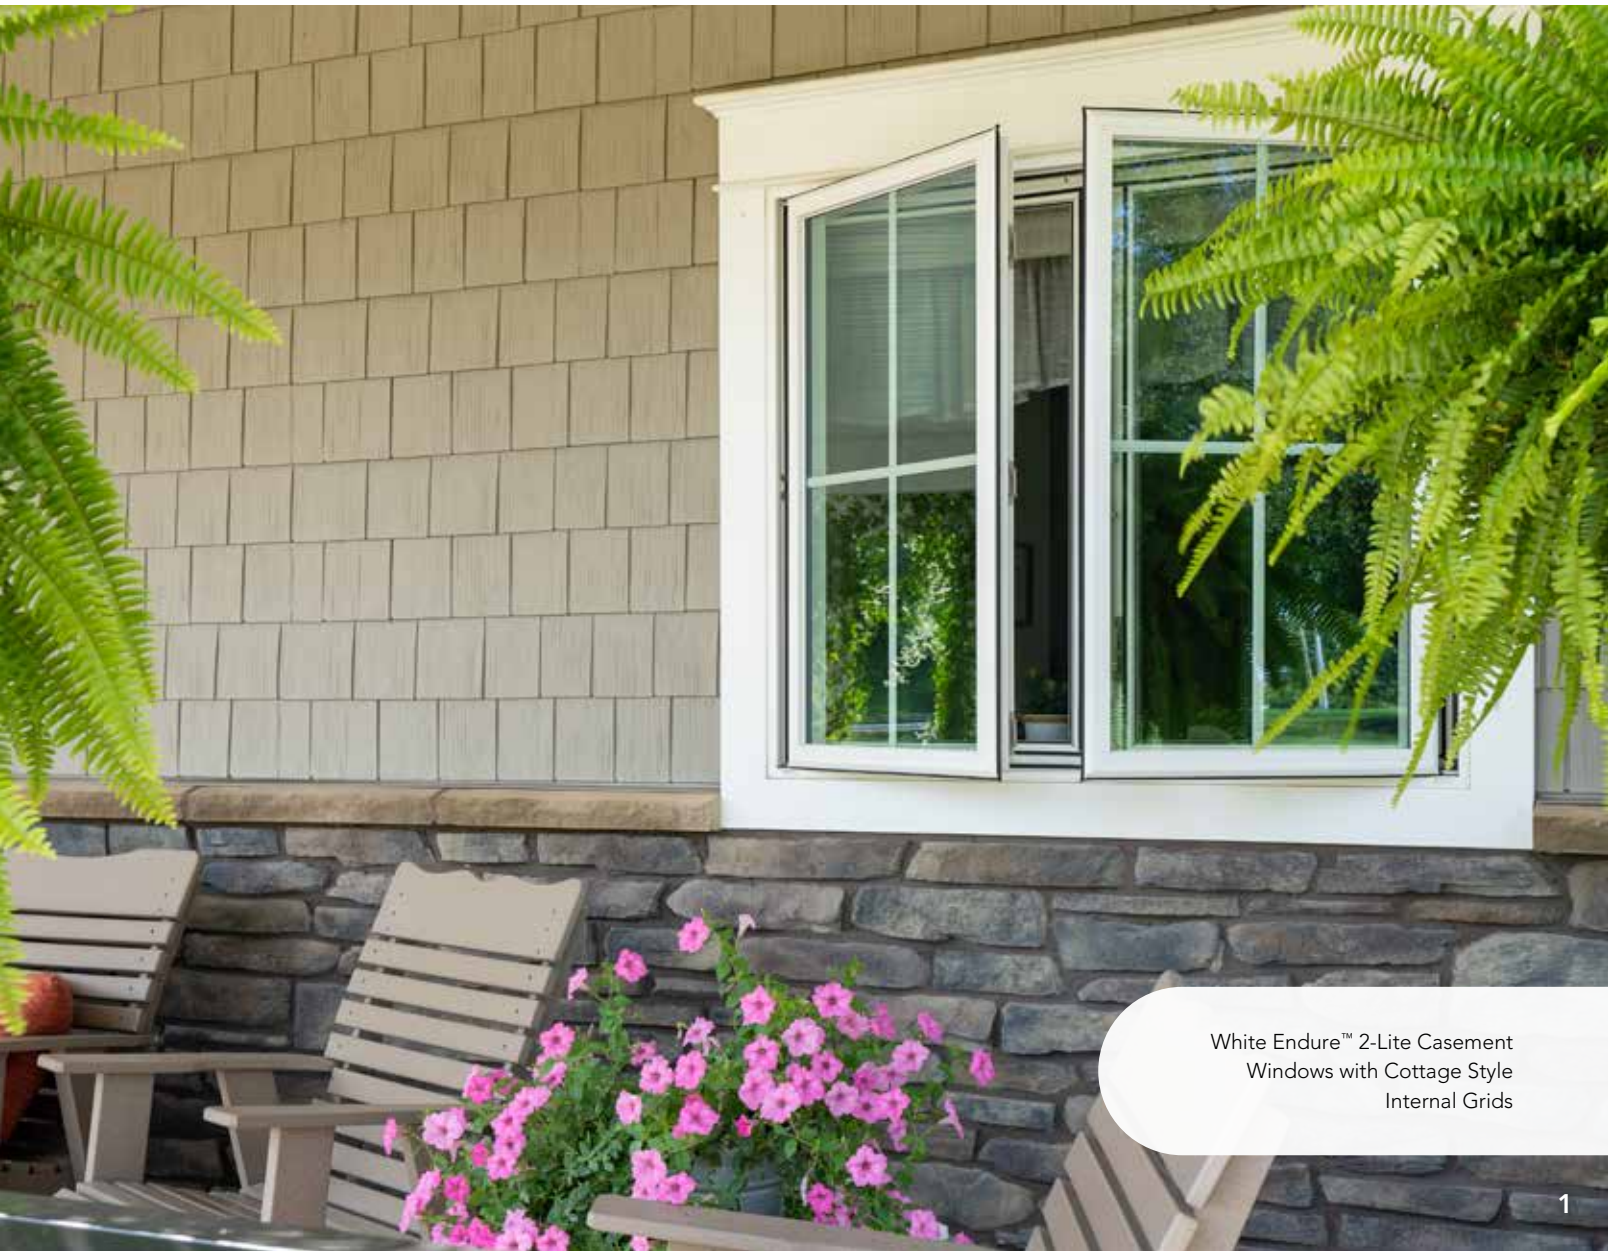

Involvement with FGIA allows ProVia to stay at the forefront of glazing and fenestration technology, benefiting from shared research and best practices.

NFRC National Fenestration Rating Council®

ProVia's participation in NFRC ensures that, through voluntary third-party testing, their products meet rigorous energy performance and rating standards, reflecting their commitment to sustainability and quality.

White Endure™ 2-Lite Casement Windows with Cottage Style Internal Grids

White Endure™ Casement Window with Colonial Style Contoured Internal Grids

ENERGY STAR® PARTNER

ProVia® ENERGY STAR certified windows are independently tested and certified to meet strict energy-efficiency standards. The annual Partner of the Year Awards are given to a select group of organizations that have made outstanding contributions to protecting the environment through energy efficiency.

ENERGY STAR is a U.S. Environmental Protection Agency (EPA) voluntary program that helps businesses and individuals save money and protect our climate through superior energy efficiency. The ENERGY STAR guidelines were established to reduce greenhouse gas emissions and other pollutants caused by the inefficient use of energy.

LEARN MORE AT ENERGYSTAR.GOV

ENERGY STAR & ENVIRONMENTAL STEWARDSHIP

When you purchase energy-efficient windows and patio doors from ProVia, you're doing more than conserving energy in your own home. You're supporting our company's commitment to protecting the environment that we all call home.

At ProVia, not only do we manufacture energy-efficient products, we also exercise corporate environmental stewardship. Here are a few examples:

- **WE RECYCLE** – Paper, metals, glass and vinyl.
- **POLLUTION PREVENTION** – Our Pollution Prevention Program has dramatically reduced solvent usage since 2002.
- **GOING PAPERLESS** – Our electronic ordering and internal paperless systems reduce paper usage.
- **SOLAR PANELS** – Solar panels are being used at three production facilities to reduce energy use.

ENERGY PERFORMANCE CALCULATOR

ENERGY STAR and is committed to helping manufacturers improve the energy efficiency of their products.

View window and patio door NFRC ratings and energy efficiency qualifications using our energy performance calculator.

Why Buy ENERGY STAR Certified Windows and Patio Doors?

SAVE ENERGY & REDUCE POLLUTION – Lower energy consumption reduces greenhouse gas emissions from power plants and shrinks a house's carbon footprint.

SAVE MONEY – Replacing old windows with ENERGY STAR certified windows lowers household energy bills by an average of 13% nationwide.

GET COMFORTABLE – With ENERGY STAR certified windows, the interior glass stays warmer, keeping you comfortable even when the temperature outside dips well below freezing.

PROTECT VALUABLE INTERIORS – Curtains, wood floors or a favorite photograph can fade or discolor after repeated exposure to direct sunlight. Many ENERGY STAR certified windows have a special coating on the glass that acts like sunscreen for your house. These special coatings reduce fading by as much as 75% without noticeably reducing visible light.

SUNSHIELD® VINYL

Your Versatile Window Solution

Endure windows are constructed of SunShield vinyl, made with a compound proven to perform better than alternative building materials. SunShield weathers the toughest conditions — from coast to coast, and everywhere in between.

SIMPLY THE BEST FORM OF PVC AVAILABLE

SunShield is the industry's most high-performing vinyl compound for color retention and impact resistance. It's a proprietary formula that's laboratory-proven to perform better than alternative building materials.

- Vinyl is the low-maintenance choice for residential use.
- The vinyl compound is uniquely formulated to withstand the harsh effects of weather, UV light and southern exposure.
- Pharmaceutical-grade compounding and blending systems provide consistency, so you can rely on superior color and weatherability.
- Industry partnerships and ongoing research into new technologies ensure the vinyl compound exceeds industry standards, outperforms the competition, and works to offer best-in-class technology.
- Resistant to rot, insect, and microbial damage.
- Never requires painting.
- Easy to clean with common household cleaners.
- 100% Recyclable for a more sustainable future.
- Helps reduce your heating and cooling costs with nearly 1,600 times the thermal efficiency of aluminum windows.
- Resistant to water and light for uniform quality and color over time.

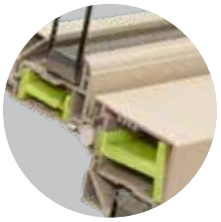

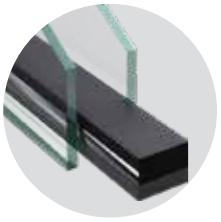

WINDOW FEATURES & BENEFITS

A **FINELINE™ TECHNOLOGY**
This innovative welding process creates an aesthetically appealing corner. Standard on laminated and painted windows.

B **REINFORCEMENT**
INNERGY® Thermal Reinforcements are the innovative, energy-efficient alternative to aluminum, providing 700x better thermal performance.

C **GLASS PACKAGE**
Endure™ windows feature a ¾" ComforTech™ Insulated Glass Unit. A DLA-UV glass package is standard.

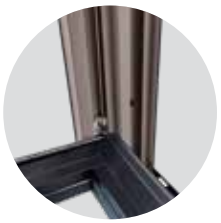

D **INSULATION**
A graphite foam insulation is added to the frame, providing greater energy efficiency and performance.

E **BARRIER-FIN WEATHERSTRIPPING**
This weatherstripping provides a barrier against air, water, dust and noise.

F **BULB SEAL WEATHERSTRIPPING**
This weatherstripping prevents water from penetrating the foam cell structure and has a unique UV-resistant barrier.

G **FRAME**
Endure windows are constructed with a 3¼" vinyl frame. Both the sash and frame are welded for increased strength.

H **SCREEN FRAME AND MESH**
Endure windows have a durable and rigid extruded aluminum screen frame with BetterVue® fiberglass mesh, which provides an enhanced view, increased insect protection and improved airflow.

FLEXSCREEN® (OPTIONAL)
A great alternative screen frame option that is easy to install. It perfectly hides within the window frame, drastically improving sight lines. This is standard on painted exterior windows.

I **PROFILE™ DA LOCKS***
"DA" stands for "Dual Action"- it locks and tilts the window all in one motion.

J **INTEGRAL INTERLOCK***
The top and bottom sashes come together with an extruded integral interlock to ensure stability when locking the window.

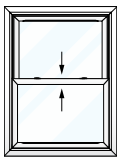

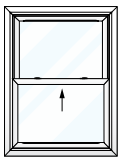

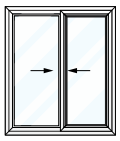

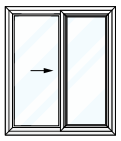

K **BALANCE SYSTEM***
The block and tackle balance system allows the top and bottom sashes on a Double Hung window to effortlessly slide up and down.

* Applies to Double Hung Windows.

GARDEN WINDOW FEATURES

A 1" ComforTech™ DC Double-Glazed Clear Glass (Double-Glazed Low-E with Argon also available).

B Twin-sealing, fully screened, operating casements with external glazing for improved weather protection.

C Locks and operators are conveniently mounted to the inside front area for easy access.

D The multi-point locking system provides a tighter seal and additional security.

E Both the venting sashes and deadlites have a built-in weep system.

F The projection of the window from the exterior wall face is a constant 17 inches.

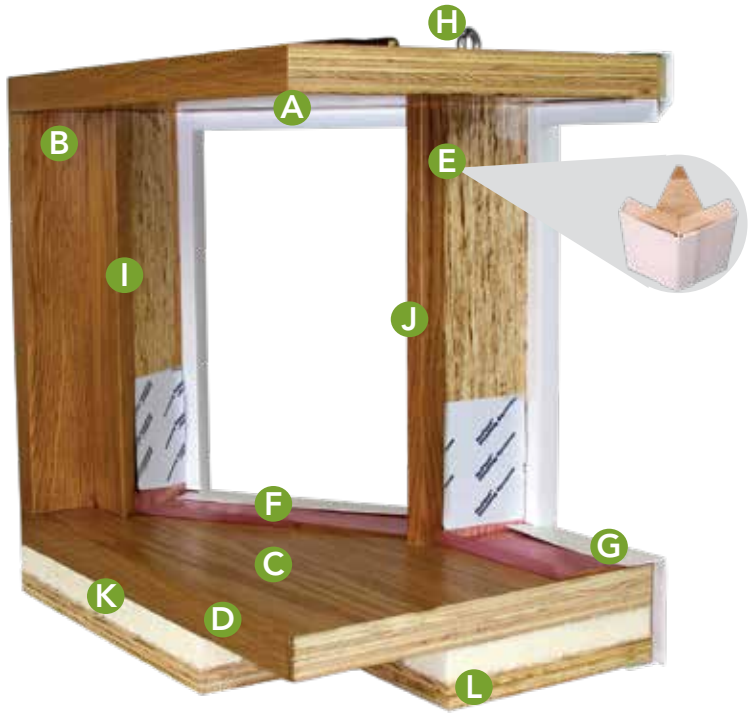

G Operating sashes come standard with FlexScreen®.

H **OPTIONAL** - One or two adjustable glass shelves with polished edges, brackets and standards. Depending on the width of the unit, the glass thickness will either be ⅜" or ½".

I Vinyl frame will not chip, rot, or peel and will never need to be painted.

SCAN FOR MORE INFORMATION ON GARDEN WINDOWS!

BAY AND BOW FEATURES

A **HEAD**

B **SIDE JAMB**

C **SEAT BOARD**: 1¼" Furniture Grade Oak or Birch Veneer.

D **EDGE BANDING**: Exposed plywood interior edges of the head, seat and side jambs are covered with matching wood edge banding.

E Our **SOLID WOOD MULLION DESIGN** is lag bolted to the head and seat for maximum strength and support. This unique design is made out of TimberStrand® laminated lumber.

TimberStrand is made from Aspen trees cut into thin strands and then dried and laminated together with a polyurethane resin. It is then pressed and steam injected to create a wood billet creating a strong and durable material that is 25% stronger than standard wood and will not absorb or release moisture.

F This **WINDOW PANNING SYSTEM** is the ultimate protection against water infiltration. The PVC panning profiles wrap around and are adhered to the vertical mullions and seat board creating an interior gutter system.

G The **EXTERIOR IS PVC WRAPPED** and painted to match the window exterior color.

H To ensure our windows will never bow or sag, we use an adjustable **TURN-BUCKLED CABLE SUPPORT SYSTEM** to support the frame from the top with a heavy-duty 6" hook and turnbuckle.

I **SIDE WEDGE**

J **MULL CAP**

K **FULLY INSULATED** (Optional)

L **INSULATE TO JAMB** (Optional)

Bay and Bow windows can be configured using a combination of Double Hung and Picture windows or Casement, Fixed Casement, and Awning windows.

MAGNETIC CASEMENT SCREEN FRAME

NEW

The Endure Magnetic Casement Screen provides a clean, seamless look from inside your home while keeping insects outside where they belong. This innovative magnetic design is tucked discreetly into the screen frame, creating a virtually uninterrupted appearance when the screen is in place. And when you want an unobstructed view, simply pull the screen frame toward you from inside the home and store it away until you're ready to use it again. Easy to install, easy to remove and beautifully unobtrusive, the Endure Magnetic Casement Screen is the perfect complement to any room where fresh air and comfort come together.

**The top magnet is fixed at 1 ⅞" from the top miter, while the second magnet is positioned approximately one-third of the way down from the top and may vary slightly based on window size.*

White Endure Mulled Casement Windows

NUCLEUS TECHNOLOGY

A Green Solution for Patio Doors

At the heart of most Endure™ Patio Door frames and sashes is our eco-friendly NUCLEUS Technology—a smart design that delivers lasting strength, energy efficiency, and sustainability.

WHAT MAKES IT DIFFERENT?

Inside the frame and sash of your patio door, you'll find a durable core made from up to 100% recycled PVC. This high-quality material is protected by a bright white exterior shell made from virgin PVC, so all you see is a beautiful, flawless finish.

IS RECYCLED PVC AS DURABLE AS NEW PVC?

Yes! PVC is a unique material that can be recycled and reused without losing strength. Using recycled PVC allows you and ProVia® to do our part in reducing waste without compromising performance.

The green color is for illustration only to indicate recycled PVC content; actual product is not green.

WHY IS THE RECYCLED CORE COVERED WITH A VIRGIN PVC SHELL?

The outer layer of virgin PVC ensures your patio door has a bright, consistent color and excellent UV resistance, keeping it beautiful for years to come.

The Benefits of NUCLEUS Technology

ECO-FRIENDLY DESIGN

A strong core made with 100% recycled PVC, making it better for the environment overall.

HIGH QUALITY YOU CAN TRUST

Our recycled materials meet strict quality standards and are AAMA certified, ensuring lasting performance and peace of mind.

WORKS SEAMLESSLY WITH OUR DESIGNS

NUCLEUS Technology is fully compatible with the Endure patio door—whether it's welded or mechanically assembled.

BUILT TO LAST

Advanced manufacturing and testing have proven that recycled PVC performs just as well as virgin PVC—offering strength, durability, and thermal efficiency you can count on.

White Endure 3-Lite Center
Operable Sliding Patio Door with
Black Signature Hardware

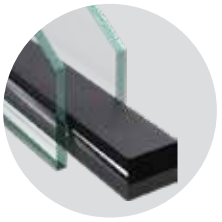

PATIO DOOR FEATURES & BENEFITS

A **FINELINE™ TECHNOLOGY**
This innovative welding process creates an aesthetically appealing corner. Standard on laminated and painted patio doors.

B **REINFORCEMENT**
Galvanized steel reinforces the panels and sill to ensure rigidity and stable operation.

C **GLASS PACKAGE**
Endure patio doors feature a 1" ComforTech Insulated Glass Unit. A DLA-UV glass package is standard.

D **INSULATION**
A graphite foam insulation is added to the frame, providing greater energy efficiency and performance.

E **BARRIER-FIN WEATHERSTRIPPING**
This weatherstripping provides a barrier against air, water, dust and noise.

F **BULB SEAL WEATHERSTRIPPING**
This weatherstripping prevents water from penetrating the foam cell structure and has a unique UV-resistant barrier.

G **ALUMINUM SCREEN FRAME WITH BETTERVUE MESH**
A rigid and durable frame that slides easily within the screen track. The mesh is very durable and provides a better view, insect protection and improved airflow.

H **SCREEN LATCH**
A spring-loaded screen latch system automatically engages upon closing.

I **SLIDING SYSTEM**
A patented sliding system, featuring four adjustable 1" wheels per operating panel, allows the sash to glide effortlessly on the sill.

J **ACCUVENT™***
A ProVia® proprietary design featuring a sash lever combined with a top-mounted ratchet and lock system allowing multiple venting locations and peace of mind.

K **PATENTED WATER DRAINAGE SYSTEM**
This allows water on the sill to drain to the exterior of the home.

L **PATIO SILL COVER**
Sill cover is available in Anodized Aluminum and a Black/Bronze finish. Standard on laminated or painted exterior patio doors. Available on 2-Lite and Multi-Slide patio doors.

* AccuVent is not available for wind load or coastal impact rated patio doors.

SCREEN MESH TYPES

BETTERVUE® SCREEN MESH (STANDARD)

BetterVue insect screening with Water Shed Technology™ coating repels water, prevents dirt and debris from staying on the screen and remains cleaner longer. It is suitable for all window and patio screen door applications.

- Durable, hydrophobic coating will not wash off
- Sheds water and debris during a rain storm
- Increases life expectancy of the screen
- Greater openness for better airflow and more natural light
- GREENGUARD certified

HEAVY DUTY SCREEN MESH

This heavy-duty mesh is made from vinyl-coated polyester, making it one of the most durable screen options on the market. It resists tears, punctures and damage from pets. This mesh is ideal for use in high traffic areas. It installs just like regular screen mesh but is three times stronger than standard fiberglass and won't need to be replaced nearly as often.

SEEVUE® STAINLESS STEEL SCREEN MESH

SeeVue is an improved visibility insect screen (iVis) woven from stainless steel. The finer wire has a black finish that maximizes the outward view for a sharper, more brilliant appearance. The stainless steel mesh provides greater strength, superior airflow, and reliable insect protection.

ALUMINUM SCREEN MESH

Charcoal aluminum screen mesh offers excellent outward visibility and is coated with a rich charcoal finish applied by an electrodeposition paint system. Glare is reduced by the dark color, which improves the outward visibility. The consistent finish of the screen gives it an architecturally pleasing appearance.

FLEXSCREEN®

BEAUTIFULLY INVISIBLE

This sleek, flexible frame hides in your window's screen track and virtually disappears, unlike other aluminum frames that block a portion of your view. With FlexScreen, you'll enjoy a better view.

DAMAGE RESISTANT

The FlexScreen frame is crafted from high-carbon, oil-tempered, phosphate-enhanced spring steel, the same material used in garage door springs and car shock absorbers. This durable core is coated with Duralloy PVC, the same protective layer found on outdoor park benches and dishwasher racks.

FlexScreen is built to endure the toughest conditions—tested in over 4,000 hours of salt spray and high wind scenarios. Whether facing harsh climates or everyday wear and tear, a properly fitted FlexScreen will perform flawlessly.

SIMPLE DESIGN

FlexScreen is the first and only window screen to include no attachment hardware. This revolutionary, flexible design snaps into place in seconds and removes just as quickly. With FlexScreen, there's no need to store your screens! The spring steel frame is coated in exterior-grade PVC and is so durable that it can withstand even the harshest elements. Leave your window screens in year-round with no worries, and save space!

EFFORTLESS INSTALLATION

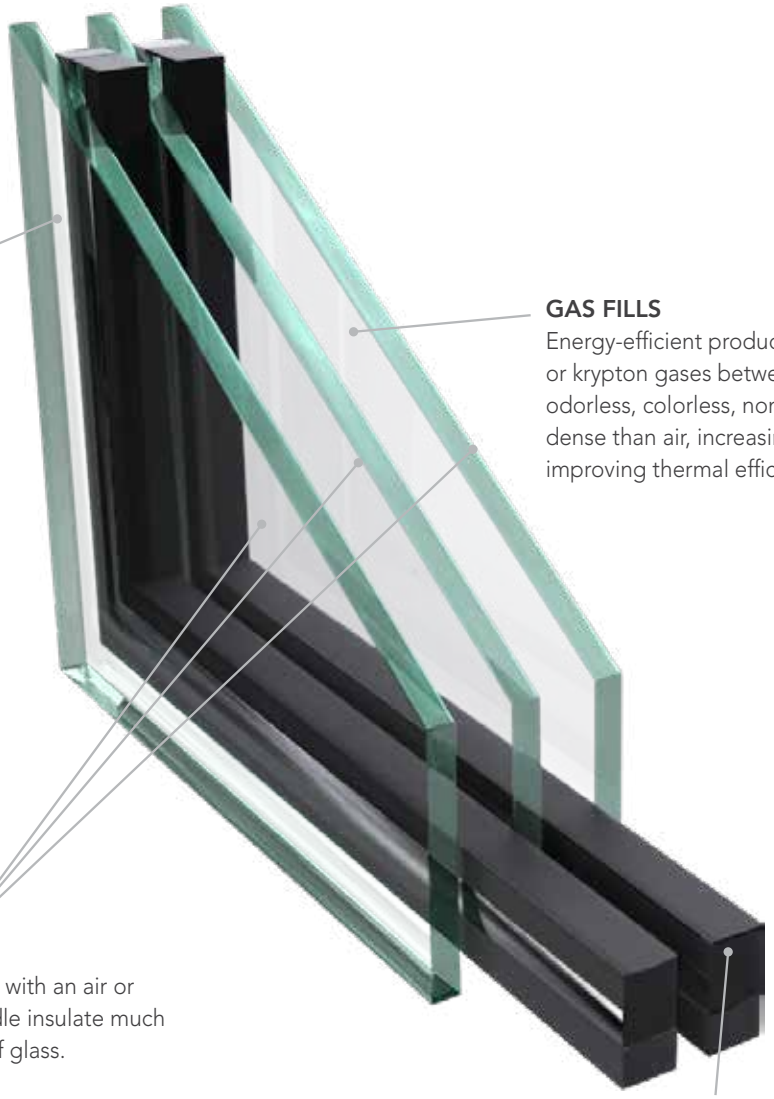

Install and remove FlexScreen easily from either inside or outside the home. With no attachment hardware required, installation is quick and hassle-free—you can screen an entire home in less than 10 minutes.

FlexScreen is standard on painted exterior double hung and slider windows and is optional on non-painted windows.

A half FlexScreen is standard on all Single Hung and Single Slider windows.

INSULATED GLASS (IG) UNITS

LOW-E GLASS
Special coatings reflect infrared light, keeping heat inside in the winter and outside in the summer. They also reflect damaging ultraviolet light, which helps protect interior furnishings from fading.

GAS FILLS
Energy-efficient products have either argon or krypton gases between the panes. These odorless, colorless, non-toxic gases are more dense than air, increasing insulation and improving thermal efficiency.

MULTIPLE PANES
Two or three panes of glass with an air or gas-filled space in the middle insulate much better than a single pane of glass.

WARM EDGE SPACERS
A spacer keeps the glass panes the correct distance apart. Non-metallic spacers insulate pane edges, reducing heat transfer through the window.

Glass Strength

Single, double and triple strength glass options are available for windows depending on the size of the window.

1x

2.5mm or 3/32" panes
Available in annealed only

2x

3mm or 1/8" panes
Available in tempered or annealed

3x

5mm or 3/16" panes
Available in tempered or annealed

SUPER SPACER®

Between You and The Elements

Warm edge technology improves insulated glass thermal efficiency while also protecting against glass package failure. The Super Spacer dual-seal system from ProVia features a nonmetallic structural foam spacer that resists condensation, improves thermal performance, reduces energy costs, and delivers lasting comfort and durability.

Super Spacer is better able to ensure NFRC ENERGY STAR® certification by providing the best thermal conductivity, the lowest U-Factor among dual-seal systems and the best durability available in the industry. The all-foam formula blocks the heat escape path, improves sound absorption over traditional metal spacers, and lasts up to nine times longer in durability tests than single-seal units. The all-foam formula reduces the effects of temperature changes, barometric pressure, wind load and glazing pressure, resulting in fewer seal failures and stress cracks.

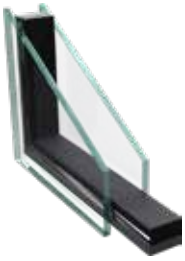

ENHANCED NOISE REDUCTION

The all-foam formula's excellent sound dampening properties reduce outside noise, even in industrial environments.

MYLAR 10-LAYER VAPOR BARRIER

The Super Spacer thermoset foam matrix is exceptional. Moisture is kept out, gas is kept in and conductivity is virtually nonexistent.

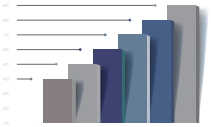

THE NO-METAL ADVANTAGE

Exceptional thermal efficiency achieved by the absence of conductive metals is the hallmark of Super Spacer.

LASTING APPEARANCE

The Warm Edge Glazing System stands up to the natural bending and bowing from temperature changes, barometric pressure and wind load.

IMPROVED STRENGTH

The P-1 test exposes units to 140°, 95-100% humidity and constant UV bombardment. Each week of testing is equal to one year of field use. Super Spacer survives with long term P-1 performance with a low seal failure history.

WARMEST EDGE

Super Spacer provides the warmest edge among dual-seal systems with up to +14.4° F / 8° C warmer temperatures at the edge of the glass.

COMFORTECH™ GLASS PACKAGES

Standard for Endure™

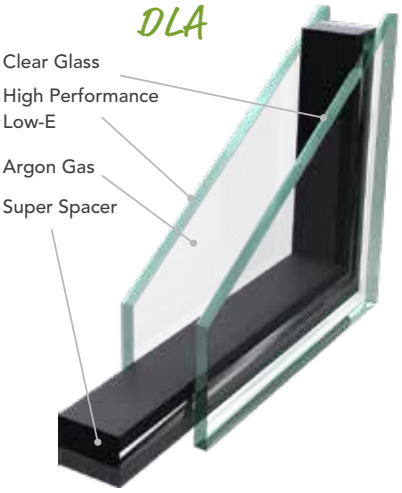

DLA-UV

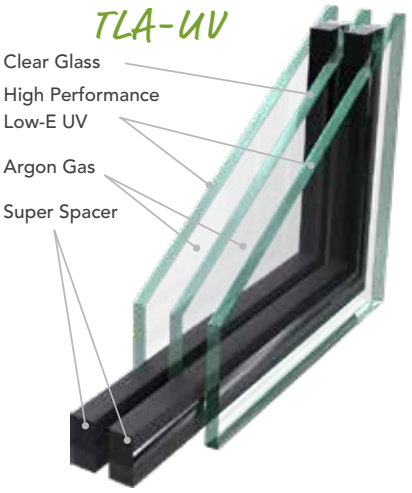

DLA-UV-HC

DLA

TLA-UV

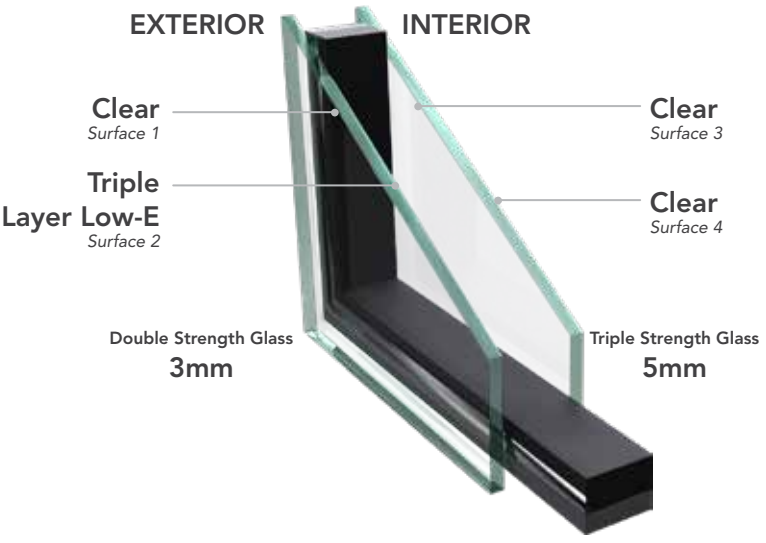

Endure windows come standard with a ¾" IG (insulated glass) unit. Windows with a triple glazed glass package will have a 1" IG unit.

Endure patio doors come standard with a 1" IG unit and will have tempered glass.

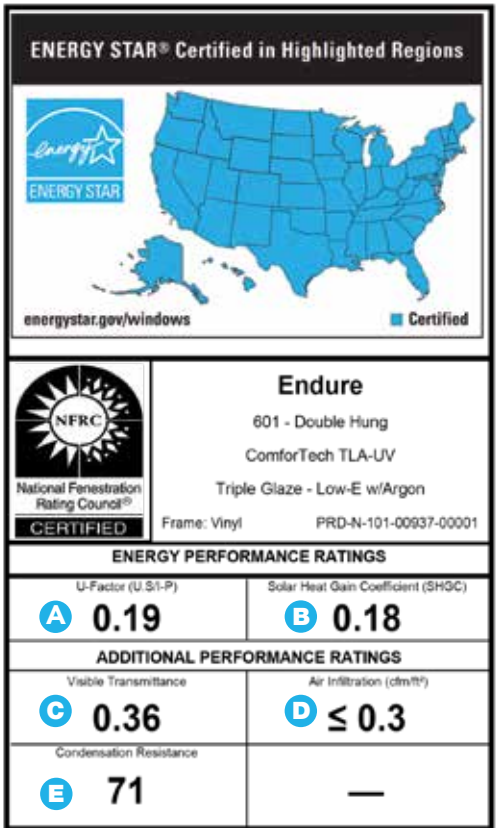

TLA and TLA-UV glass packages may appear tinted green and vary in shade with changing lighting conditions, both indoors and outdoors.

Sound Reduction Glass Package

Enjoy a quieter, more comfortable home with our Sound Reduction Glass Package, designed to help minimize outside noise. This package combines double strength (3mm) glass on the exterior with triple strength (5mm) glass on the interior for enhanced sound reduction compared to standard single-strength glass. Available with a variety of glass options, including DC, DLA and DLA-UV. This glass package can provide up to a 25% reduction in sound transmission (STC) and up to 18% reduction of outdoor-indoor sound transmission (OITC) compared to a standard DLA unit with single-strength glass.

ENERGY STAR REQUIREMENTS

Climate Zone	U-Factor	SHGC	
Northern	≤ 0.22	≥ 0.17	Prescriptive
	= 0.23	≥ 0.35	Equivalent Energy Performance
	= 0.24		
	= 0.25	≥ 0.40	
	= 0.26		
North Central	≤ 0.25	≤ 0.40	
South Central	≤ 0.28	≤ 0.23	
Southern	≤ 0.32	≤ 0.23	

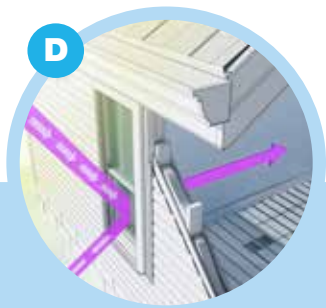

U-Factor
Insulating value of the entire window system. Lower numbers reflect better insulating value.

Solar Heat Gain Coefficient (SHGC)
Amount of heat from the sun passing through the glass. Lower numbers indicate glass is keeping heat from entering your home. SHGC is measured on a scale from 0 to 1.

Visible Transmittance
Amount of visible light passing through the glass. Higher numbers indicate glass is allowing more light to enter your home. Visible transmittance is measured on a scale from 0 to 1.

Air Infiltration
How much air is entering or escaping through the window. Lower numbers indicate air is kept from entering or escaping.

E **Condensation Resistance** – Amount of moisture it takes for glass to condensate when exposed to extreme interior and exterior temperature changes. Higher numbers indicate better resistance to condensation. Condensation resistance is scored on a scale of 0 to 100.

Textured Matte Coal Black Mulled
Endure™ Double Hung Windows
with Internal Grids

PRIVACY GLASS

Choose from seven different types of glass if you need light to filter in, yet want to maintain privacy.

Chinchilla*

Fluted

Frosted

Gluechip

Obscure Pebble

Taffeta

Waterfall

For units with Waterfall privacy glass wider than 52", the pattern will be horizontal instead of vertical.

Actual privacy levels will vary depending on your distance from the glass and also the amount of light in the room in comparison to the light outside your home. For extra privacy, contact customer service to add an extra pane of privacy glass to your window or patio door order.

***Chinchilla Privacy Glass Disclaimer:** Due to the unique, tightly grooved texture of Chinchilla privacy glass, this design naturally reflects and refracts light in a more noticeable way. As a result, the glass may display a more pronounced V-like or diamond-shaped pattern, especially in certain lighting conditions. This characteristic is a normal and expected feature of the Chinchilla glass design and is not considered a defect.*

INTERNAL GRIDS

If you want grids but prefer not to clean around them, opt for internal grids so you get the same look without the hassle.

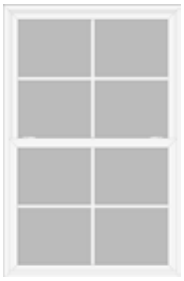

Contoured

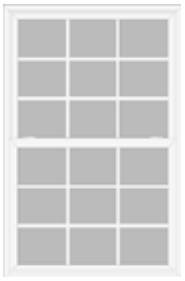

Flat

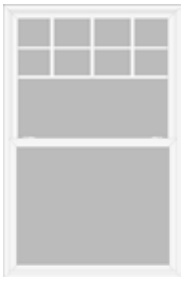

V-Groove
Available in ⅜"

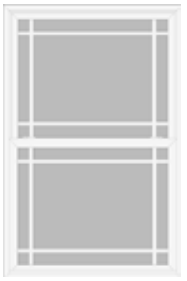

Cottage

Colonial

Modified Colonial

Prairie

TINTED GLASS

Tinted glass can help reduce UV transmittance, solar heat gain and glare. Tinted glass color options can give a room a whole new look, providing its own unique set of benefits.

Bronze

- High visible light transmittance
- Adds warm glow to interiors
- Complements brick and stone
- Ultraviolet light protection

Green

- Subdues interior brightness
- High visible light transmittance

Gray

- Excellent glare control
- Exceptional protection against interior fabric and color fading
- Ultraviolet light protection

Blue

- Low shading coefficient
- High visible light transmittance
- Solar performance (reduces solar heat gain)

Tinted glass images are shown against a white background to highlight the color. Actual appearance will vary based on factors such as the direction the glass is facing, surrounding light conditions, and whether it is shaded or exposed to direct sunlight.

SIMULATED DIVIDED LITES FOR WINDOWS

Capture the charm of old-world craftsmanship with Simulated Divided Lites (SDLs)—designed to replicate the traditional look of individual glass panes separated by wooden grids. Our SDLs achieve this stunning aesthetic with contoured wood or composite grids applied to the exterior of the glass, creating depth and dimension. Paired with ComforTech™ glass packages, windows with SDLs offer superior energy efficiency while maintaining the classic appeal of handcrafted design.

Why Choose Simulated Divided Lites?

- **AUTHENTIC APPEARANCE** – Get the elegant look of true divided lites without compromising on energy efficiency.
- **ENERGY-EFFICIENT GLASS PACKAGES** – Available with ComforTech glass for optimal insulation and performance.
- **VERSATILE STYLE OPTIONS** – Choose from several grid patterns or create a custom design.
- **PREMIUM MATERIALS** –
  - **Wood SDLs** can be stained or painted for a rich, natural finish.
  - **Composite SDLs** are paintable to perfectly match your window color.

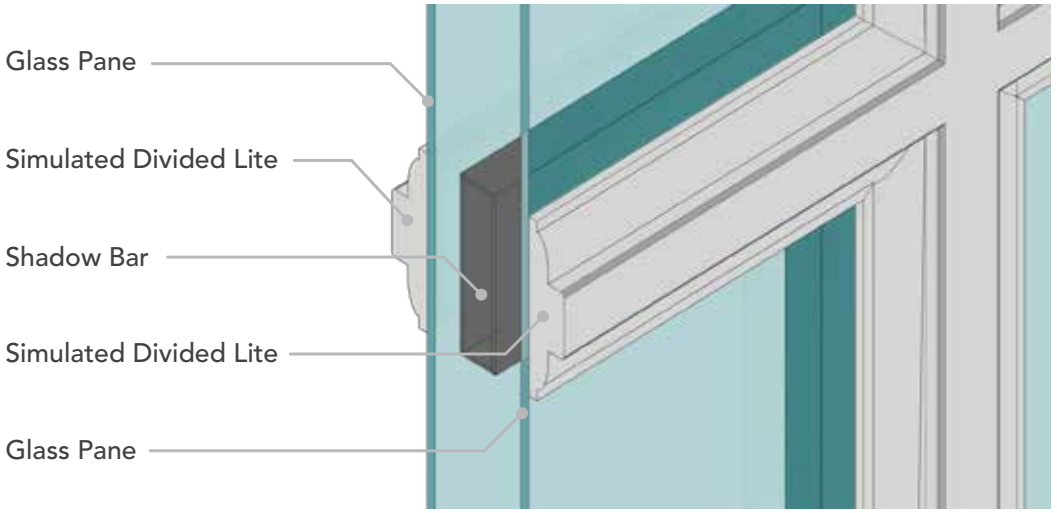

Stained Wood

Painted Composite

- **SEAMLESS INTEGRATION** – SDLs are applied to both the interior and exterior of the insulated glass (IG) unit, with a shadow bar inside the glass for enhanced depth.

Most grid patterns will use flat bronze aluminum grids as shadow bars.

White Endure™ 4-Lite Sliding Patio Door with White Internal Blinds and Satin Nickel Signature Hardware

INTERNAL BLINDS

Crafted with powder-coated aluminum extrusions, our internal blinds are designed for exceptional UV resistance. Encased in an insulated glass unit, these blinds are shielded from weathering, damage, and dust, ensuring long-lasting performance. The ergonomic operator allows for effortless control, making it easy to raise, lower, and tilt the blinds to your desired position.

While internal blinds offer a practical solution for blocking harsh sunlight and enhancing privacy, they are not intended as full privacy or blackout devices.

Available Colors

White

Cream

Tan

Silver

Champagne

Black

- Customer may choose if the blind operator is on the right or left on windows.
- Silver and Champagne blinds will have a matte finish.
- Blind slats are ½" wide.
- Internal blinds come with a 10-year Limited Warranty.
- Blinds and grids not available together.
- Availability subject to size limitations.

DECORATIVE GLASS FOR WINDOWS

Decorative glass is unique in that it achieves its personality and beauty through aesthetic imperfections – waves, striations, and air bubbles that create natural effects and singular characteristics. ProVia® decorative glass mimics the hand-made sheet glass of centuries past, and these stunning ornamental designs elevate the look of your windows, boosting the curb appeal of your home.

ProVia Exclusive

These decorative glass designs are only found on ProVia products. This gives your home a unique style that can't be found anywhere else.

Covered by a Lifetime Limited Warranty

Warranty includes glass breakage and seal failure.

ART GLASS COLOR & GLASS OPTIONS

Select from a variety of standard and trending colors (shown below). *Clear Fill* and *No Fill* may also be chosen, as well as custom colors. Color placement and number of colors is pre-determined based on the Art Glass design and will render as you choose them. Picture this as a color-by-number system! Experiment with various color combinations until you find the perfect match for your home.

Snow Mist
Café Cream
Eggshell
Toasted Coconut
Sandpiper Beige
Sandstone

RESIN BEAD OPTIONS

Black
Clay
Silver
Gunmetal
Bronze

PRIVACY GLASS OPTIONS

Chinchilla

Gluechip

Obscure

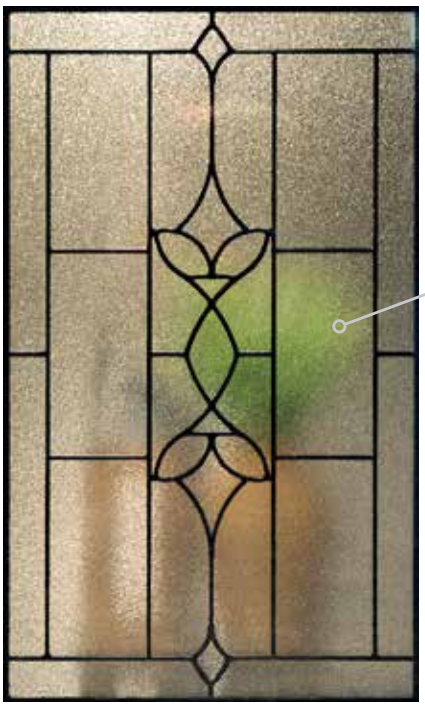

Taffeta

Privacy glass is tempered for safety and this process may cause minuscule surface waves on the glass. Since the surface is not completely flat, the color fill may migrate toward lower points in the glass, resulting in varied saturation levels on the surface.

Art Glass is also available on Bronze, Gray, Green and Blue tinted glass.

ART GLASS COLOR FILL EXAMPLES

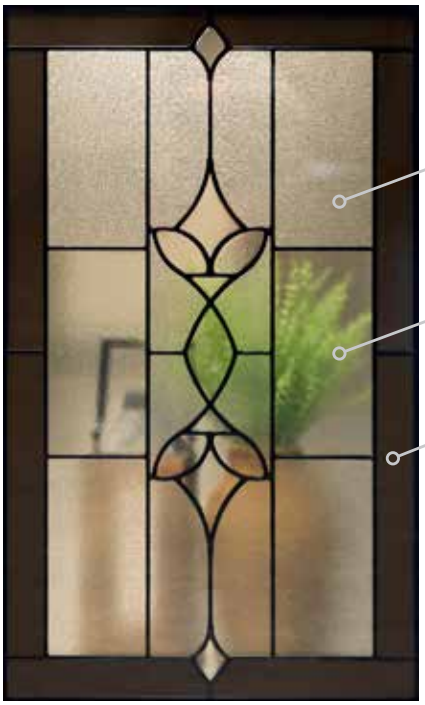

Choose your favorite Art Glass design, then have fun making it your own. Add color, mix and match colors, choose clear fill for a more transparent look, or leave the design unfilled for a clean, simple aesthetic. You can even change the look with your choice of one of five resin bead colors. With so many combinations to choose from, your Art Glass can be uniquely yours.

WARRANTY HIGHLIGHTS

BASIC WINDOW OR PATIO DOOR UNIT - LIFETIME TRANSFERABLE

The rigid vinyl components of the window or patio door are warranted against chipping, cracking, peeling, pitting, blistering, warping or delamination for as long as you own and live in the home in which the product was originally installed. This warranty is transferable to one subsequent purchaser.

HARDWARE - LIFETIME

ProVia® further warrants the moving parts, such as balances on double hung windows and locking mechanisms in all units, for as long as the original purchaser owns and lives in the home in which the product was originally installed, if those parts are not free from defects in material and workmanship under conditions of normal use and wear.

PATIO DOOR HANDLES - LIFETIME / 1 YEAR

ProVia further warrants all patio door handles with a Bright Brass, Satin Nickel or Aged Bronze finish against tarnishing for as long as you own and live in the home in which the product was installed. Patio door handles with a painted finish, Flat Bronze, Modern Bronze or Antique Brass finish are warranted against flaking, checking, blistering or peeling for a period of (1) year from date of installation.

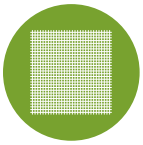

INSULATED GLASS UTILIZING SUPER SPACER® - LIFETIME

ProVia further warrants the insulated glass units utilizing Super Spacer in its vinyl windows or patio doors against defects resulting in material obstruction of vision as the result of film formation between the interior glass surfaces caused by failure of the air-tight seal, for as long as the original purchaser owns and lives in the home in which the product was originally installed. Small spots, marks, lint, and scratches not exceeding applicable glass manufacturing specifications imposed by Federal Specification 1036-90 will not constitute defects under this warranty.

GLASS BREAKAGE - LIFETIME

ProVia further warrants the insulated glass units utilizing Super Spacer in its vinyl windows or patio doors against breakage as follows: (1) If the glass in a properly registered and warranty covered unit breaks as the result of a manufacturing defect; (2) In the event of an accident in the home that is not covered by insurance or is of an amount that is within the insurance policy deductible, ProVia will replace the glass free of charge, for as long as the original purchaser owns and lives in the home in which it was originally installed. Glass breakage is not covered for insulated glass units with internal blinds or insulated glass units in Garden Windows.

SCREENS - LIFETIME

Further, ProVia will replace under normal conditions of use, for as long as the original purchaser owns and lives in the home in which the product was originally installed; for manufacturing defects, if the fiberglass, aluminum or stainless steel screening is not free from rotting, staining, or rusting. No warranty herein covers torn screen mesh caused by abnormal use, negligence, or other means not controlled by ProVia.

FLEXSCREEN® - LIFETIME

Further, ProVia will replace under normal conditions of use, for as long as the original purchaser owns and lives in the home in which the product was originally installed; for manufacturing defects, if the fiberglass screening is not free from rotting, staining, or rusting. No warranty herein covers torn screen mesh caused by abnormal use, negligence, or other means not controlled by ProVia.

PAINT/STAIN FINISH - 15 YEAR / 10 YEAR

ProVia further warrants the factory-applied paint on vinyl window components against cracking, pitting, peeling, blistering or suffering from non-uniform fading discoloration (non-uniform fading discoloration resulting from unequal exposure of surfaces to the sun and elements is not covered by this warranty) and defects in material and workmanship for a period of fifteen (15) years from date of installation.

INTERNAL BLINDS - 10 YEAR

Internal blind units are warranted against seal failure and defects in material and workmanship for a period of ten (10) years from date of installation.

BAY, BOW & GARDEN WINDOWS - 10 YEAR

Bay and Bow windows (frames and roof kits) and Garden Windows (frames, sashes, hardware and insulated glass units) are warranted against defects in material and workmanship for a period of ten (10) years from date of installation.

TRANSFERABLE WARRANTY

The Warranty on the basic window or patio door unit is transferable by the original purchaser to one subsequent purchaser for purchaser's personal residence provided the warranty transfer is completed within thirty (30) days after the date of transfer of ownership. Warranty transfers must be completed online at www.provia.com/warranty.

NON-RESIDENTIAL & MULTI-FAMILY APPLICATIONS

Where the structure in which the product is installed is not a single family residence occupied by the purchaser, or is owned by a public or private corporation for profit or non-profit, an unincorporated association or other business entity of any type recognized by law, a church, a school, a governmental or public authority, the time periods stated in this warranty shall be limited as follows: Basic Window or Patio Door Unit – 5 Year (non-transferable); Hardware - 1 Year; Insulated Glass – 10 Year (glass breakage not included); Internal Blinds – 5 Year; Screens – 5 Year; and Finishes – 1 Year.

COASTAL APPLICATIONS

For products that are installed in a Coastal region the time periods stated in this warranty shall be limited as follows: Non stainless steel hardware mechanisms in Casement Window & Patio Door units - 5 year mechanical warranty; Aged Bronze, Bright Brass or Satin Nickel Patio Door Handles – 10 Year Finish. Definition of Coastal Regions: For information and maps of Coastal regions please go to www.provia.com/coastalwarranty.

HOME EXTERIOR SOLUTIONS

DISCOVER MORE

WEBSITE

ProVia.com makes it easy to explore and compare numerous door, window, siding, stone or roofing options in a straightforward, interactive way. Configure a door or window, visualize products on your home, explore color palettes, and learn about different architectural styles—all from our innovative Design Center. Save your favorite products, colors, photos or ideas throughout the site into your own ProVia® portfolio for reference any time and share them across your favorite social media platforms.

VISUALIZER

Let your imagination run free with this exterior home design tool. Select from a library of existing home styles or upload a photo of your own home.

In a few easy steps, update your siding color, add stone or metal roofing, configure windows, or create a one-of-a-kind entry door system.

Looking for professionally inspired color and product palettes? Apply one of our pre-selected Designer Collections to create a curb-appealing look.

APP

Use the ProVia App to configure doors and windows or select from an extensive collection of vinyl siding, manufactured stone and metal roofing styles.

Features:

- Door and Window Configuration
- Vinyl Siding Profiles, Colors and Accessory Accents
- Manufactured Stone Styles, Color Palettes and Grout Options
- Metal Roofing Profiles, Trims and Colors
- Videos, Photo Galleries and Catalogs
- ProVia Dealer Locator
- Request a Quote Directly from Local Dealers

50 YEARS *of* PURPOSE

Thank You for Being Part of Our Story

As ProVia® commemorates its 50th Anniversary, we extend our sincere gratitude to homeowners like you for your trust and support over the years. This milestone is not ours alone. The confidence our customers have placed in us has been an important part of our story and our success.

Our Purpose defines why we exist: *To let our light shine before others, so that they may see our good works and give glory to our Father who is in heaven (adapted from Matthew 5:16).*

The ProVia team has always embraced opportunities to demonstrate our purpose, vision, and values. Each member is committed to serving our customers faithfully, by manufacturing exceptional home exterior products and delivering unmatched quality and service.

That commitment has been part of who we are since Bill Mullet founded the company in 1977. For five decades, our faith has inspired us to serve others with integrity, ingenuity, honor, and honesty. Our commitment to putting customers first and pursuing the highest standards of quality continues to guide everything we do.

Thank you for welcoming us to your home. As we celebrate 50 years, we look forward to serving homeowners like you with the same purpose, passion, and dedication for generations to come.
