Gable Vents

From protection to performance to style, these vents have it all. Their woodgrain finish and sharp distinctive features provide exquisite architectural detail, while their double baffle design provides added protection from the elements. And with the most styles, sizes and colors in the industry, it's no wonder they've become the industry benchmark.

Standard Blocks and Vents

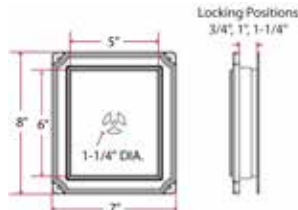

Mounting blocks and utility vents serve a specific, utilitarian purpose, but that doesn't mean they can't have elegance and design. With a wide variety of selections and colors to choose from, our blocks and vents match most manufacturers' siding colors, while also concealing cut edges for that finished look.

Ignition Properties

Flash Ignition Temperature (F°) (D1929) 807°

Self Ignition Temperature (F°) (D1929) 878°

Important Fire Safety information - When rigid siding is exposed to significant heat or flame, the vinyl will soften, sag, melt, or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment material because many underlayment materials are made from organic materials that are combustible. You should ascertain the

fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations

2.03 Accessories

Accessories to be equal to dimensions as shown and shall be produced from compounds with comparable properties to the siding.

3. INSTALLATION WORKMANSHIP

3.01 Inspection Prior to commencing work, verify governing dimensions of building. Examine substrate flaws and defects.

3.02 Preparation All substrate flaws and defects must be corrected prior to siding installation. Walls must be in plane and clear to receive siding.

3.03 Installation ProVia sidings and soffits must be installed in strict accordance with the "Rigid Vinyl Siding Application Manual" published by the Vinyl Siding Institute.

3.04 Field Inspection Upon installation completion, visually inspect for defective installation or manufacturing defects. Repair as necessary.

3.05 Clean Up When siding installation is complete, clean siding to remove all foreign debris and soiled areas. Remove all packaging and remaining material from job site.
