

# REPLACEMENT INSTRUCTIONS

## DUALTECH™ LOCK FOR VINYL WINDOWS

1

Completely remove bottom sash from window unit. Place bottom sash on a flat surface with exterior side facing up.

2

Using a screwdriver, remove the (2) screws from each existing lock. To release cam arm, rotate the lock clockwise for LH side or counterclockwise for the RH side.

4

Install new replacement latch assembly by sliding into the latch pocket. Be sure latch assembly is flush with window stile.

3

Grasp the end of the latch assembly and pull to remove. Repeat on opposite side.

5

With the lock in the unlocked position, place the cam arm in the corresponding hole of the latch assembly.

# REPLACEMENT INSTRUCTIONS DUALTECH™ LOCK FOR VINYL WINDOWS

6

Gently push down on cam arm until the clasp is fully seated.

7

Rotate lock to fully engage. Rotate the lock in a counter-clockwise direction for LH side or clockwise for the RH side.

8

Test function of lock to ensure the full assembly is operating properly.

9

With DualTech™ assembly in full operation, secure each lock with the (2) color-matched screws.
